

Glasp PDF Highlighter

Introduction

Welcome to Glasp PDF Highlight Mode!

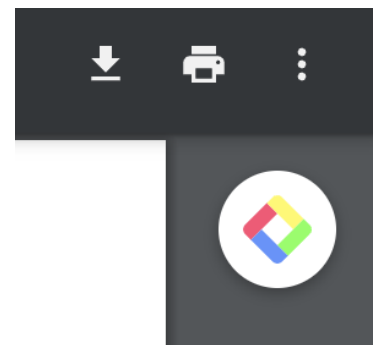

You can highlight and annotate text on PDF files hosted on the web.

If you haven't installed Glasp browser extension yet, please install [Chrome Extension](#) or [Safari Extension](#).

How to Use Glasp PDF Highlighter

1. Open PDF file on the web
2. Click the Glasp icon on the right top
3. You're ready to highlight!

*Due to technical reasons, you can't highlight on your local PDF files or PDF files that don't have open-access on the web as of September 2022.

Trouble Shooting

- In case that the PDF file doesn't have open-access on the Internet, Glasp PDF highlighter cannot open and highlight the PDF file.
- In case that your highlights are not properly loaded after refreshing, please try to open the PDF file from the original link.
